

LITHO FILL

Functional additive in
various industrial
applications.

Advantages and properties:

- Very pure natural Zeolite, with a high content of Clinoptilolite
- Extremely high porosity
- High cationic exchange capacity
- Very fine particle sizes starting at 8µm (topcut)

Application Examples

- **Carrier**
for liquids and gases
- **Paints and coatings**
anti-settling agent, smell binder, thickener
- **Plastics industry**
Odor binding agent, carrier material for flavours,
Reduction of volatile organic compounds (VOC), increased breath ability
- **Filler material in rubber**
Improvement of hardness, increase of tensile strength and elongation at break,
increase of the ignition temperature, reduction of the density
- **Additive in adhesives**
Faster drying, odor reduction
- **Construction chemicals**
Prevention of segregation, prevention of cracking, increase of material strength
